Communication, Requirement Analysis,
Feedback Loop, Process Improvement

ABOUT ME

I am a software QA engineer originating from Bangladesh dedicated to ensuring top-notch quality and seamless user experiences. My enthusiasm for quality extends beyond development. I thrive on the challenge of testing and uncovering software bugs to enhance the overall user experience. Whether it's a complex software application or a simple, playful website, I consistently pursue excellence and perfection in every project I work on.

WORK EXPERIENCE

Software QA Engineer

June 2023 - Present

Nagad Ltd

- Coordinating product's quality planning, working with the team and technical leaders to deploy new features successfully
- Leveraging experience in MFS, DFS, banks, payment systems, and databases
- Ensuring overall system migration, transformation and new platform implementation by E2E, UAT, DB, API and Automation testing
- Improving existing features through UAT, Regression Testing, Integration testing, Functional testing
- Creating test cases for current and upcoming feature work, focusing on long-term test goals
- Maintaining JIRA, Zephyr Scale, test case management tools, and reports

Intern (QA)

January 2023 - May 2023

Nagad Ltd.

- Learnt in-depth about MFS and Nagad
- Performed API testing
- Documentation and FRS analysis
- UI-UX Testing

PROJECTS

- Mobile Financial Service (MFS): QA for a secure mobile app enabling banking transactions and money transfers.
- HRMS: Ensured HR processes automation and compliance in a comprehensive HR management system
- Government projects like Ibas++ and A-Chalan
- Nagad Super App migration
